🤖 Function and Arrow function ➡️

```javascript
const fullName = 'DJ Speedloader 🎧';
const major = 'Business 🤓';

// Regular function which accept 2 parameters:
function aNormalFunctionTavuh(param1, param2) {
  console.log(`1. ${param1} est en majeur ${param2}`);
}
// Call the regular function and pass 2 parameters:
aNormalFunctionTavuh(fullName, major);
```
